Municipal

At Houston Engineering, we know that municipal infrastructure is more than just streets and sewer lines. Properly designed infrastructure should be functional, expandable, and aesthetically pleasing as well as affordable. Integrated green space and other public lands bring a sense of community pride and ownership. Well designed infrastructure can ease traffic congestion, encourage pedestrian usage, and help define the character of a neighborhood, now and well into the future. Our municipal department is well known for producing layouts that improve flow and safety for both vehicle and pedestrian traffic. We utilize the latest technology to create solutions that provide lasting value. Together, we can build a better community.

We Can Offer Solutions For

- Street, Road, Landscaping, and Highway Design
- Water Storage and Distribution
- Solid Waste Disposal
- Lift and Pumping Stations
- Stormwater Studies and Planning
- Stormwater Facilities
- Parks, Trails, and Recreational Facilities
- Environmental Documentation Clearance
- Landscape Architecture
- Financial Planning and Budgeting
- Community and Land Use Planning
